

## **MICHAEL BRYAN-BROWN**

### **PRINCIPAL ENGINEER**

#### **Education:**

#### **Tufts University - School of Engineering**

Bachelor of Science in Civil Engineering (BSCE) Class of 1989

#### **Experience Summary:**

Mr. Bryan-Brown is a Civil/Environmental Engineer with experience in biosolids management, wastewater treatment and solid waste management. He is president and co-founder of Green Mountain Technologies, an innovative manufacturer of composting equipment in the U.S. As such, he has overseen the design and installation of more than 50 composting systems and facilities in the 25+ years of history in the company. He is holder of 3 U.S. patents in the field of composting. In addition to his work with Green Mountain Technologies, he has worked as consultant to the City of New York Department of Sanitation for food waste composting. Previously, he worked on EPA grants to investigate on-site composting systems for organic wastes. As consulting engineer to the City of New York Department of Environmental Protection, he was contracted for the assessment of odor impacts from 8 proposed sludge composting facilities. Responsibilities included the characterization of odor emissions from compost processes and the preliminary design of ventilation and odor control equipment for all facilities.
