

PRE-ENGINEERED ASP SYSTEM PRICING INFORMATION

In order to meet a variety of size constraints and capacity requirements, we offer the Pre-Engineered ASP system in four different sizes. Systems can have anywhere from one to eight zones per control panel, making it a cost-effective solution for operators handling 500 to 20,000 tons per year. Additionally it is suitable for most common feedstocks such as yard waste, green waste, and food waste. You won't find an aerated system cheaper and more effective than Green Mountain Technologies' Pre-Engineered ASP on the market today.
